REPORT

TO

HIS EXCELLENCY EDMUND BERNARD, VISCOUNT FITZ ALAN, &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

I have the honour of submitting to Your Excellency the Fifty-seventh Annual Report on the Vital Statistics of Ireland, as recorded for the year 1920.

The marriages in Ireland numbered 26,826, and were equivalent to the rate of 5·98 per 1,000 of the estimated population; in the year 1919, the number of marriages was 27,193, and the rate 6·09; this was the highest rate obtaining for Ireland since 1864, the first year of central registration of all marriages.

The births numbered 99,536, corresponding to a rate of 22·2 per 1,000, as compared with the rate of 20·0 per 1,000 in the year 1919, the average rate for the decennium, 1910–1919, being 21·7 per 1,000 of the mean population of these years.

The death-rate for the year 1920 is the lowest that has been reported for Ireland. The total deaths recorded numbered 66,538, equal to an annual rate of 14·8 per 1,000 of the population of Ireland estimated to the middle of the year. In the year 1919 the death-rate was 17·6 per 1,000 and the average rate for the years, 1910–1919, was 16·9 per 1,000. An examination of the principal causes of death, as set forth in the table on pages 16–17, shows that the deaths from all forms of tuberculosis which in the year 1919 numbered 8,643 declined to 7,651 in the year under notice; the former figure represents an annual rate of 1·94 per 1,000, and the latter a rate of 1·70 per 1,000 of the respective estimated populations for the years 1919 and 1920.

There were also considerable reductions in the deaths from bronchitis and from pneumonia as compared with preceding years, the deaths from bronchitis falling from 6,593 in 1919 to 5,241 in 1920, and the deaths from pneumonia from 5,245 in 1919 to 4,134 in 1920.

The deaths from violence, as registered in 1920, amounted to 1,851; of this figure 423 deaths were classified to homicide, 95 to suicide, one to execution and 1,332 to other violent deaths (including those caused by accidents); the corresponding figures in the year 1919 were the total 1,436, homicides 67, suicides 130, and other deaths by violence (including accidental causes) 1,239.

TABLE I.—Showing for each of the years 1910–20 the estimated **Population***; the number of **Marriages, Births** and **Deaths** registered, and the number of **Emigrants** (Natives of Ireland) enumerated, with the rates per 1,000 of the estimated Population represented thereby; and the averages for the ten years, 1910–1919.

YEARS.	**Estimated* Population in the middle of each year.	Numbers *Registered*.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population.

* See page 40.

MARRIAGES.

The marriages registered during the year amounted to 26,826 being equivalent to a rate of 5·98 per 1,000 of the estimated population* ; this rate is 0·11 under that for the previous year, but 0·69 above the average for the ten years, 1910–1919.

Of these marriages, 18,290 were of Roman Catholics, as compared with 18,756 in 1919 ; the remaining marriages numbering 8,536 in 1920, as against 8,437 in 1919. Included in the 8,536 marriages are 3,937 celebrated according to the rites and ceremonies of the Church of Ireland, as against 4,247 in 1919 ; 3,215 as compared with 3,008 in 1919, were in Presbyterian Meeting-houses ; 678 as against 643 in 1919 in " Registered Buildings " belonging to various religious denominations ; 678 by civil contract in the Registrars' offices, as against 514 in 1919 ; one was according to the usages of the Society of Friends, as against 6 in 1919 ; and 27 as compared with 19 in 1919, were according to the Jewish rites.

The marriages of Roman Catholics are equivalent to a rate of 5·52 per 1,000 of the estimated Roman Catholic population, or 0·43 above the corresponding average rate for the preceding ten years, and the other marriages are equivalent to a rate of 7·28 per 1,000 of all persons other than Roman Catholics in the population, this rate being 1·41 above the corresponding average rate for the ten years, 1910–1919.

TABLE II.—**Marriages** registered in Ireland in 1920, and in each of the previous ten years, according to the **modes of celebration ;** with the rate per 1,000 of the population represented.

As derived from the figures given in the Abstract of Marriages, pages 8–9, it will be found that 88·2 per cent. of the total marriages were those of bachelors and spinsters ; that 6·1 per cent were those of widowers and spinsters ; that 3·8 per cent. were marriages of bachelors and widows ; and that those of widowers and widows formed 1·9 per cent. of the total marriages. Thus, of the men married, 8·0 per cent. were widowers, and of the women 5·7 per cent. were widows ; in 12 instances in every 100 marriages, one or both of the contracting parties had been in the married state before.

* The rates for the total of Ireland, the county boroughs of Dublin and Belfast and Londonderry county and county borough, are based on the estimated population in the middle of the year 1920, those for the provinces and remaining counties on the population according to the Census of 1911. (See page 40).

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education in Ireland. In the year 1920 there were 26,018 or 97·0 per cent. of the husbands, and 26,272, or 97·9 per cent., of the wives, who wrote their names, and the remainder signed by " mark," as against 20,666, or 93·5 per cent. of the husbands, and 21,074 or 95·3 per cent., of the wives in the year 1910.

The number of Licences for Marriages issued by the Registrars during the year 1920 in Registered Buildings and in the Registrars' Offices was 1,172.

BIRTHS.

The number of births registered during the year 1920 was 99,536—51,275 boys and 48,261 girls—the ratio per 1,000 of the estimated population being 22·2, which is 0·5 above the average rate per 1,000 for the ten years 1910–1919.

The total births in 1920 are 10,211 above those registered in the preceding year, viz., 89,325.

The proportion of male infants born alive in 1920 was 106·2 to every 100 females ; in 1919 it was 107·1 to 100 ; in 1918 it was 104·7 to 100 ; in 1917 it was 105·2 to 100 ; and in 1915 the proportion was 106·5 males to 100 females.

Of the 99,536 births registered in Ireland during the year, 96,223 or 96·7 per cent were legitimate, and 3,313 or 3·3 per cent. were illegitimate, the latter being the same as the percentage for the preceding year. As regards illegitimacy Ireland compares favourably with most other countries.

The male children born in wedlock numbered 49,532, and the female 46,691, or 106·1 of the former to every 100 of the latter ; of the illegitimate children, 1,743 were males, and 1,570 females, being 111·0 boys to 100 girls.

Of the children born in Ulster, 4·2 per cent. were illegitimate ; in Leinster, the percentage was 3·5 ; in Munster, 2·8 ; and in Connaught, 0·9 ; the corresponding percentages for the preceding year being :—for Ulster, 4·0 ; for Leinster, 3·5 ; for Munster, 3·0 ; and for Connaught, 0·8,

In the provinces the rates represented by the total births registered during the year 1919 were as follows :—Leinster, 23·7 per 1,000 of the population in 1911 ; Munster, 21·0 ; Ulster, 24·7 ; and Connaught, 18·4.

Of the total births, 54·4 per cent. were registered in the first six months of the year (182 days), and 45·6 per cent. in the second six months of the year (184 days).

The total number of births registered in the first quarter of the year was 26,745 ; in the second, 27,424 ; in the third, 23,596 ; and in the fourth, 21,771.

Multiple Births.

There were 1,175 twin births and 12 triplet births registered in Ireland during the year 1920. The twin births were 1·18 per cent. of the total births, 1·21 per cent of the single births, and 1·19 per cent. of the total mothers.

DEATHS.

The deaths registered in Ireland during the year numbered 66,538, and afford a rate of 14·8 per 1,000 of the population, estimated to the middle of 1920. Of the deaths 33,141 were males, and 33,397 were females, equivalent to 14·6 and 15·1 per 1,000 of the male and female population, respectively.

The total death-rate is 2·8 per 1,000 below that for the year 1919, and 2·1 below the average death-rate for the 10 years, 1910–1919.

For the province of Leinster the death rate was 16·3 per 1,000, for Munster 13·7, for Ulster, 16·3, and for Connaught 12·5.

Of the total deaths, 18,772 were registered in the first quarter, 18,445 in the second, 13,900 in the third, and 15,421 in the fourth.

Of the deaths registered during the year under review, 55·9 per cent. occurred during the first six months, January to June inclusive, and 44·1 per cent. in the remaining six months.

The annual rates represented by the deaths registered in each quarter are as follows :—16·7 per 1,000 of the population for the first quarter ; 16·5 for the second ; 12·4 for the third ; and 13·8 for the fourth. The rate for the first quarter is 3·5 below, for the second 1·2 below, for the third 1·3 below, and for the fourth 2·4 below the average rate for the corresponding quarters in the ten years, 1910–1919.

It will be observed from the table on page 30, *that* 4,414 *of the* 66,538 *deaths registered during the year took place in Infirmaries and General and Special Hospitals ;* 1,411 *in Public Lunatic Asylums ;* 8,919 *in Workhouses and Workhouse Hospitals ; and* 51,794 *were of persons who died " At their Own Homes," &c.*

Of the total deaths registered in Ireland, 6·6 per cent. occurred in " Infirmaries and General and Special Hospitals," the percentages for the four provinces varying from 1·3 in Connaught to 12·9 in Leinster. Deaths which took place in the Workhouses or Workhouse Hospitals constituted 13·4 per cent. of the total deaths, the respective percentages of these deaths for the provinces being—Leinster, 14·6 ; Munster, 19·2 ; Ulster, 10·5 ; and Connaught, 9·4.

CAUSES OF DEATH.

In the table which follows, the number of deaths from some of the principal diseases are shown for the years 1919 and 1920, also the averages for the 10 years 1910–1919.

Causes.	Number of Deaths registered			Causes.	Number of Deaths registered.		
	Years.		Average 10 years 1910-19		Years.		Average 10 years 1910-19
	1920.	1919.			1920.	1919.	
Enteric Fever ...	245	189	269	Cancer	3,823	3,864	3,796
Typhus ...	42	34	41	Cerebro-spinal Fever ...	30	40	44
Measles ...	505	257	647	Pneumonia	4,134	5,245	4,361
Scarlet Fever ...	315	263	282	Bronchitis	5,241	6,593	6,528
Whooping-cough	980	445	824	Diarrœha and Enteritis	908	918	1,292
Diphtheria ...	519	253	306	under two years of age			
Influenza ...	1,256	9,406	2,930	Puerperal Septic Diseases	252	155	190
Tuberculous ...				Accidents of Pregnancy	298	263	302
Disease ...	7,651	8,643	9,430	and Childbirth ...			

It will be seen from this table that deaths from tuberculosis which in the year 1919 numbered 8,643, declined to 7,651 in the year 1920 ; deaths from influenza from 9,406 to 1,256 ; deaths from pneumonia from 5,245 to 4,134 ; and deaths from bronchitis from 6,593 to 5,241.

There was generally an increase in the mortality from the principal epidemic diseases ; enteric fever which caused 189 deaths in 1919 caused 245 in 1920 ; typhus in 1919 caused 34 deaths and in 1920 caused 42 deaths ; deaths from measles rose from 257 to 505 ; from scarlet fever from 263 to 315 ; and from diphtheria from 253 deaths in 1919 to 519 deaths in 1920.

Puerperal Septic Diseases which in the year 1919 caused 155 deaths were accountable for 252 deaths in 1920, and the deaths from accidents of pregnancy and childbirth increased from 263 to 298 in the year under notice.

Enteric Fever.—The deaths (245) include 134 of males and 111 of females ; the total although greater than that in the year 1919, is below the average (269) for the 10 years 1910–1919.

Typhus.—Although the deaths (42) are 8 more than in 1919, they only exceed the average by one death ; of the total 21 were deaths of males and 21 were of females.

SMALL-POX.—One death from small-pox of a person (stated to be unvaccinated) who came from Glasgow was registered in Enniskillen district in the first quarter of the year. During this quarter one case of the disease was reported from Termonfeckin district, in Drogheda Union and one from Coolattin district, in Shillelagh Union.

MEASLES.—The deaths (505) were below the average (647), but as mentioned before well in excess of the deaths (257) registered in the year 1919 from this disease ; of the deaths (505) there were 262 of males and 243 of females.

SCARLET FEVER.—In the table on page 16 it will be seen that during the preceding decennium the highest mortality from scarlet fever was in the year 1914, when 507 deaths were registered ; the average number for the decade is 282, and the deaths in the year under notice, 315 ; of this figure 159 were deaths of males and 156 were of females.

WHOOPING-COUGH.—The mortality from whooping-cough, although high, was exceeded in each of 3 years in the preceding decade, namely, in 1910, 1912, and 1918 ; in the year 1920 the deaths numbered 980, and of this figure 475 were deaths of males and 505 were of females.

DIPHTHERIA.—The record of mortality from diphtheria is higher than that of any one year in the preceding decade and is 213 over the average (306) for that period. The deaths in 1920 numbered 519, of males 279 and of females 240. These do not include 53 deaths assigned to croup, of which 27 were deaths of males and 26 of females.

INFLUENZA.—Influenza, which in the years 1918 and 1919, caused the deaths of 10,651 persons in the former and 9,406 in the latter year did not recur as an epidemic in the year 1920, during which year the deaths attributed to influenza numbered 1,256 ; this number represents an annual rate of 0·28 per 1,000 of the estimated population of Ireland in the middle of the year 1920. Of the total deaths (1,256) there were 621 of males and 635 of females.

DYSENTERY.—Twenty deaths are attributed to dysentery, including 9 of males and 11 of females.

DIARRHŒAL DISEASES.—Deaths under this heading include 908 of children under 2 years of age from diarrhœa and enteritis ; the latter figure is 384 below the average for the past decade and the lowest number recorded since the year 1912 when 897 deaths of children were classified to this group of disease.

MALARIA.—Four deaths were caused by malaria.

OTHER EPIDEMIC DISEASES.—There were 4 deaths assigned to cholera nostras, 2 to mumps, 4 to German measles, and 6 to varicella.

SYPHILIS.—There were 90 deaths stated to be caused by syphilis, and 5 by other venereal diseases ; of the 90 deaths, 70 were of infants under 2 years of age.

Deaths from general paralysis of the insane were 84 in number ; 25 were from locomotor ataxia, and 26 from aneurysm.

TETANUS.—Of 30 deaths from tetanus 19 were of males and 11 were of females.

TUBERCULOSIS.

The recorded mortality rate for tuberculosis which in each of the years 1900 and 1904 had reached 2·88 per 1,000 of the estimated population declined in the year 1910 to 2·28 per 1,000, and in the year under notice to 1·70 per 1,000. In the year 1900, the total deaths from tuberculosis amounted to 12,859, in 1904 to 12,694, in 1910 to 10,016, and in the year 1920 to 7,651. Of this total 5,911 were attributed to pulmonary tuberculosis, 487 to tuberculous meningitis, 481 to tuberculous disease of the peritoneum and intestines and 772 to other forms of tuberculosis.

Details respecting the sexes, and ages of those dying from the various forms of tuberculosis, will be seen in the abstract of causes of death, commencing on page 24, also the localities in which the deaths occurred by Provinces, Counties, and Superintendent Registrars' Districts.

In England and Wales the death rate for tuberculosis in the year 1920 was 1·13 per 1,000 and in Scotland it was 1·24 per 1,000 of the population.

A comparison of the mortality from tuberculosis in Ireland in 1920 with the ten years preceding is afforded by the following table :—

Year.	Males.		Females		Total		Annual Increase.		Annual Decrease.	
	Number of Deaths.	Rate per 1,000 of the Male population.	Number of Deaths.	Rate per 1,000 of the Female population.	Number of Deaths	Rate per 1,000 of the population.	Number.	Per cent.	Number.	Per cent.

* Decrease in 1919 as compared with 1920.

Of the total deaths (7,651) from tuberculosis, 2,381, corresponding to an annual death rate of 2·05 per 1,000 were registered in the Province of Leinster ; 1,613—rate, 1·56—in Munster ; 2,962—rate, 1·87—in Ulster ; and 695—rate, 1·14 per 1,000—in Connaught. As compared with the year, 1919, there were 380 fewer deaths in Leinster, 220 in Munster, 329 in Ulster, and 63 in Connaught.

The following Table shows by counties the mortality represented by the number of deaths registered from all forms of tuberculous disease during the year 1920, with the increase or decrease in the latter year as compared with 1919.

CANCER.—A small reduction in the number of deaths from cancer as compared with the year 1919, namely from 3,864 in 1919 to 3,823 in 1920 is recorded; the figure for 1920 is represented by a rate of 0·85 per 1,000; in the year 1916 the cancer rate for Ireland, 0·90, was the highest recorded for the country.

Of the deaths (3,823) there were 1,869 of males and 1,954 of females, corresponding to the respective rates of 0·85, 0·82 and 0·88 per 1,000.

The total deaths from cancer, include deaths returned as from carcinoma, sarcoma, cancer, and malignant disease.

Particulars as to sex, age, and parts affected can be seen in Table III, page xii.

TUMOUR.—Twenty-nine deaths were assigned to other tumours, the nature of which was not ascertained on inquiry; there were also 31 deaths from tumours of the uterus and 30 from tumours of the ovary, which were either stated to be non-cancerous, or their nature was not obtainable.

RHEUMATISM.—The total deaths from diseases in this group numbered 697, an increase of 44 over the number in 1919, and 145 over the number in 1918. The total (697) includes 155 deaths from acute rheumatism, 90 from rheumatic arthritis, 32 from rheumatic endocarditis, 406 from chronic rheumatism, 11 from osteo-arthritis and 3 from rheumatic gout.

There were 7 deaths not included in above total attributed to gout.

DIABETES.—There were 355 deaths from diabetes, as compared with 339 in the year 1919, and the average for the preceding decade 381. Of the 355 deaths 197 were of males and 158 of females.

OTHER GENERAL DISEASES.—In this group, exophthalmic goitre caused the deaths of 34 persons, including 5 deaths of males; Addison's disease caused 29 deaths of which 12 were of males; there were 25 deaths from leucocythæmia, including 11 deaths of males; lymphadenoma caused the deaths of 19 persons, 13 being males; and from anæmia and chlorosis 409 deaths were registered, including 237 deaths of females.

ALCOHOLISM.—Deaths referred directly to alcoholism which had declined to 19 in the year 1919, were 42 in 1920; of this number 33 deaths were of males.

There were 140 deaths from cirrhosis of the liver.

INDUSTRIAL POISONING.—As in the year 1919, there was one death from chronic lead poisoning.

[TABLE

TABLE III.—Showing the deaths registered from Cancer* in Ireland during the year 1920, by Sexes, Ages, and parts affected.

* Including Carcinoma, Sarcoma and Cancer, Malignant Disease.

CEREBRO-SPINAL FEVER.—The deaths from this disease in the year 1920 were 30 as compared with 40 in the year 1919 ; the 30 deaths include 19 of males and 11 of females.

MENINGITIS.—There were 108 deaths from encephalitis, 52 of males and 56 of females ; the deaths of males include 18 returned as encephalitis lethargica, and the deaths of females include 25 from the same cause. The number of deaths from simple meningitis was 545, of males, 284, and of females 261.

EPILEPSY.—The deaths numbered 246, of males 128 and of females 118 ; in the 3 preceding years deaths from epilepsy were 353, 288 and 296, respectively.

CONVULSIONS.—Convulsions was the registered cause of the deaths of 1,012 persons, 578 being deaths of males and 434 of females. The 1,012 deaths represent a rate of 0·23 per 1,000 of the estimated population, or 1·5 per cent. of the total deaths registered. Of the total (1,102) there were 848 infants under the age of one year and 95 between the ages of one year and two years, the 848 deaths being 10·3 per cent. of the total deaths of infants under one year of age from all causes for the year under notice.

CEREBRAL TUMOUR.—The deaths from cerebral tumour numbered 54, of males 24 and of females 30.

NEURITIS.—The deaths, 45 in number, under the heading hysteria, neuralgia, neuritis included 24 of males, and 21 of females. In the 3 years preceding, deaths from these causes were 60, 36 and 45 respectively.

DISEASES OF THE HEART.—The deaths of 7,010 persons (males 3,379, and females 3,631), or 10·5 per cent of the total deaths, were due to heart disease, and afford a rate of 1·56 per 1,000 of the estimated population. Included in the total deaths, were 25 from pericarditis, 48 from acute myocarditis, 24 from infective endocarditis, 37 from acute endocarditis, 2,352 from valvular heart disease and chronic endocarditis, 49 from fatty heart, and 176 from cardiac dropsy.

BRONCHITIS.—There were 5,241 deaths from bronchitis, equivalent to an annual rate of 1·17 per 1,000. These deaths are nearly 8 per cent. of the total deaths registered, and are below the average (6,528) for the previous decade.

PNEUMONIA.—The deaths from pneumonia declined from 5,245 in the year 1919 to 4,134 in 1920, the latter figure is equal to a rate of 0·92 per 1,000, and is 6·2 per cent of the total deaths. The total includes deaths from lobar pneumonia broncho-pneumonia, and pneumonia, not defined.

PLEURISY,EMPYEMA.—Including deaths from empyema for which no other cause could be ascertained, the deaths assigned to pleurisy in 1920 were 202 in number ; of these 115 were of males and 87 of females.

In the course of 17 years, 1904–20, the deaths of 545 persons (390 males and 155 females) were registered as having been caused by empyema. Resulting from special inquiry as regards the 390 deaths of males, 98 were transferred to tuberculous disease, 37 to pneumonia (10 to lobar pneumonia, 7 to broncho-pneumonia, 2 to pleuro-pneumonia, and 17 to pneumonia, type not stated), 7 to influenza, 6 were assigned to injury, 2 to enteric fever, and 19 to other causes Fifty cases were stated to have originated with pleurisy.

The investigation into the 155 deaths of females resulted as follows :—40 were transferred to tuberculous disease, 18 to pneumonia (9 to lobar pneumonia, 3 to broncho-pneumonia, and 6 to pneumonia, type not stated), in 9 cases influenza was ascribed as the origin, in one enteric fever, and in 6 cases other causes were assigned. In 20 instances pleurisy was ascribed as the cause.

As regards 171 deaths of males, and 61 of females, the causes originating empyema could not be ascertained.

CIRRHOSIS OF LIVER.—The deaths from cirrhosis of the liver numbered 140 and include 92 deaths of males, and 48 of females; in the three preceding years deaths from cirrhosis of the liver were 175, 165 and 146 respectively.

PREGNANCY AND CHILDBIRTH.

The mortality of women during pregnancy and childbirth is classified under three headings, namely, (1) septic conditions, (2) Intrinsic accidents of childbirth and (3) disease or cause associated with pregnancy and childbirth. To the first group 252 deaths were attributed in the year 1920, to the second 298, and to the third 73; altogether the deaths of childbearing women numbered 623. This number exceeds such deaths in the year 1919 by 99. The total deaths represent a rate of 6·26 of the total births registered, as compared with 5·87 in the year 1919, and with 5·83 per 1,000, the average rate for the decade 1910–19.

Table IVB. shows that the increased mortality is caused by puerperal septic diseases, which increased from 155 deaths in 1919 to 252 in the year 1920. Deaths from accidents of pregnancy and childbirth show an increase of 35 deaths, from 263 in 1919 to 298 in 1920. The deaths of women from causes associated with pregnancy and childbirth which were 106 in the year 1919 declined to 73 in the year under review.

TABLE IVA—Showing the number of deaths of women in pregnancy in 1920 definitely returned as either caused by or associated with pregnancy or childbearing.*

VIOLENCE.—The deaths from violence registered during the year 1920 in Ireland include 423 attributed to homicide, 95 to suicide, one death by execution, 24 deaths of soldiers caused by wounds received in battle and 1,308 by other causes, including accidents; these taken together give a total of 1,851 violent deaths. In the year 1919 the corresponding total was 1,436, including 67 deaths by homicide, 130 by suicide, 24 by wounds received in battle, and 1,215 other deaths by violence, including accidental deaths.

The deaths assigned to homicide (423) include those of 397 males (7 of these being infants under one month old), and 26 of females, 8 of whom were under one month old.

Of the deaths of males attributed to homicide, 381 were caused by gunshot wounds and of the deaths of females, 12 deaths were so caused,

The suicidal cases (95) include the deaths of 82 males and 13 females.

The deaths, other than those which have been classified to homicide, suicide and execution include 24 by accidental poisoning, 289 by burns and scalds (136 of these were of children under 5 years of age), 207 by drowning, and 78 by gunshot wounds.

Of the 24 deaths from accidental poison 5 were ascribed to alcohol, 3 to food poisoning 4 to carbon monoxide, coal gas, and 2 to strychnine.

ILL-DEFINED CAUSES OF DEATH.

In this group 33 deaths were from dropsy, 65 from syncope, 54 from sudden death (not otherwise defined), 518 from heart failure, 550 from debility or atrophy 2 from teething, 64 from other ill-defined causes, and in 96 cases the cause of death was not specified. The above deaths were in the aggregate 1,401, and constituted was not specified. The above deaths numbered in the aggregate 1,401, and constituted 2·1 per cent. of all deaths registered during the year 1920.

UNCERTIFIED CAUSES OF DEATH.

Of the total deaths (66,538) there were 14,744 which were not certified by a medical practitioner; of this number 9,962 were deaths of persons aged 65 years. and upwards, and 1,929 were of infants under one year of age. The uncertified deaths are 22·2 per cent. of the total deaths. The proportion of uncertified cases for the year 1919 was 21·9 and the average for the ten years, 1910–19, was 22·3.

INQUESTS.

According to returns furnished by the Registrars, the number of inquests during the year 1920 was 1,260, or one inquest for every 53 deaths registered.

AGES AT DEATH.

Deaths of children under 5 years of age during the year numbered 12,237, or 18·4 per cent. of all the deaths registered, the deaths of male children amounting to 6,640, or 20·0 per cent. of the total deaths of males, and the deaths of female children, 5,597, or 16·8 per cent. of the deaths of females at all ages.

There were 27,137 deaths of persons aged 65 years or upwards, being 40·8 per cent. of the total deaths registered. Included therein are 22,388 deaths of persons aged 70 years or upwards, or 33·6 per cent. of all the deaths recorded during the year.

Among these deaths are 415 of persons aged 95 years or upwards, 197 being those of males, and 218 of females, including 85 deaths, comprising 28 of males, and 57 of females, whose ages at death were returned at 100 years or upwards.

The death rates per 1,000 of the population at each of the undermentioned age-periods, were as follows :—Under 5 years 30·4 per 1,000 ; 5 and under 10 years, 3·4, 10 and under 15 years, 2.7 ; 15 and under 20 years, 4.0 ; 20 and under 25 years; 5·1 ; 25 and under 35 years, 5·7 ; 35 and under 45 years, 7·7 ; 45 and under 55 years, 13·3 ; 55 and under 65 years 24·5 ; 65 and under 70 years, 32·5 ; 70 and under 75 years, 43·5 ; and at the age period, 75 years and upwards, the rate was 119·7 per 1,000 of the estimated number living at this age-period.

INFANT MORTALITY.

The deaths of 8,262 infants under one year of age were registered in Ireland during the year 1920, a number equivalent to 83 in every 1,000 births registered as compared with 88 per 1,000 in 1919, and an average of 90 for the ten years 1910–19.

The deaths of infants under one year old in 1920 include 4,635 males and 3,627 females, the former number being equal to 90 per 1,000 births of males, and the latter affording a rate of 75 per 1,000 births of females. The corresponding infant mortality rates for 1919 were 97 and 78 respectively.

In 1920 and 1919 the rates for deaths of infants under one year of age in England and Wales were 80 and 89 per 1,000 births respectively, the rates for Scotland being 92 and 102 per 1,000 births registered.

The following table contains particulars regarding "Nineteen Town Districts," the remainder of the country and Ireland as a whole, with corresponding figures 1919 :—

AGES.	Infant Mortality, 1920—Deaths under one year per 1,000 Births registered.

The aggregate infant mortality rate for the "Nineteen Town Districts" in 1920 was 119·61 per 1,000 births registered, as compared with 116·06 in 1919. For the remainder of the country the rate in the former year was 63·14 as against 74·06 in 1919. Thus the rate for the town districts is 3·55 per 1,000, or 3·1 per cent more than that for 1919, while the mortality among infants in the remainder of Ireland is 10·92 per 1,000, or 14·7 per cent., less than that which prevailed in the year 1919.

In Table V. the rates for the entire country are given for each of the eleven years 1910–1920 by causes of death, and in the case of the latter year by sexes and age-periods.

Similar information based on the births and deaths registered during the year 1920 in the Registrars' Districts containing the nineteen principal town districts of Ireland is afforded by Table VI.

According to the Yearly Summaries of the Weekly Returns furnshed by the Registrars, the infant mortality rates (corrected for births and deaths in institutions) for the "Nineteen Town Districts" in 1920 with the increase or decrease as compared with the average rate per 1,000 births for the five years preceding, were as follows:—Dublin Registration Area 143, decrease 9; Belfast 132, increase 5; Cork 80, decrease 33; Londonderry 95, decrease 19; Limerick 109, decrease 8; Waterford 97, decrease 15; Galway 85, decrease 9; Dundalk 76, decrease 20; Lurgan 78, decrease 24; Drogheda 101, increase 9; Lisburn 147, increase 24; Newry 70, decrease 17; Portadown 78, decrease 44; Wexford 104, increase 5; Ballymena 69, decrease 30; Sligo 131, increase 8; Kilkenny 76, increase 3; Tralee 65, increase 4; and Clonmel 49, decrease 29.

During the year 1920, the infant mortality rate for London was 75 per, 1,000 births and in 1919 it was 85, the rate for Liverpool in 1920 was 111 per 1,000 births and in 1919 the infant mortality was 110; the respective infant mortality rates in 1920 and 1919 for Glasgow were 107 and 114, and for Edinburgh, 89 and 117.

Table VII. affords a comparison of the rates of infant mortality per 1,000 births in 1920 with 1919, represented by the deaths of infants under one year of age as *registered* in each county and county borough in Ireland.

TABLE V.—Showing for Ireland the Mortality, by certain causes, among infants under 12 months old, per 1,000 Births registered in the ten years 1910–1920, and by Sexes and Age-periods for the latter year.

EMIGRATION.

Acording to the returns furnished to this Department by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants (natives of Ireland) who left the ports of Ireland during the year 1920 was 15,531, of whom 6,044 were males and 9,487 were females. Of the total emigrants, 1,706 were natives of the province of Leinster, 4,724 of Munster, 5,300 of Ulster, and 3,801 of Connaught.

THE WEATHER.

Reports on the weather throughout Ireland during each quarter of the year 1920, as furnished by the Meteorological Office, are published in my Quarterly Returns of Marriages, Births and Deaths for that year.

I have the honour to be,

Your Excellency's faithful servant,

WILLIAM J. THOMPSON.

Registrar General.

General Register Office,

Charlemont House,

Dublin, 21*st September*, 1921.

NOTE.—This Table has been constructed for the year 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year as given in the Irish Census Reports of 1851 ; an allowance proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872 to 1914—By adding the births registered in each year to the estimated population for the previous year, deducting the deaths and the number of emigrants, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911, respectively, and the population as shown by the Census in each of these years.

1915 to 1920—The estimated population for each of these years has been computed as in 1914 with some additional adjustments with regard to the movements of the military.

AGES of the POPULATION in IRELAND according to the Census Returns of 1861, 1871, 1881, 1891, 1901, and 1911.

Periods.	Sexes.	AGES—YEARS. Under 1.	1 and under 5.	5 and under 10.	10 and under 15.	15 and under 20.	20 and under 25.	25 and under 35.	35 and under 45.	45 and under 55.	55 and under 65.	65 and under 75.	75 and under 85.	85 and under 95.	95 and upwards.	TOTAL

Clones .. 158, 168
Clonmel .. 109, 113
Coleraine .. 162
Cookstown .. 172
Cork .. 73
Corofin .. 62
Crom .. 92

D.

Delvin .. 48
Dingle .. 87
Donegal .. 140
Downpatrick .. 151
Drogheda .. 31, 34
Dromore West .. 207
Dublin .. 6, 8
Dundalk .. 32
Dunfanaghy .. 141
Dungannon .. 173
Dungarvan .. 114
Dunmanway .. 74
Dunshaughlin .. 35

E.

Edenderry .. 12, 23, 36
Ennis .. 63
Enniscorthy .. 52
Enniskillen .. 136, 159
Ennistimon .. 64

F.

Fermoy .. 75, 93

G.

Galway .. 179
Glennamaddy .. 180
Glenties .. 142
Gorey .. 53
Gort .. 181
Granard .. 28, 49, 137

I.

Inishowen .. 143
Irvinestown .. 160, 174

K.

Kanturk .. 76
Kells .. 37
Kenmare .. 88
Kilkeel .. 152
Kilkenny .. 17
Killadysert .. 65
Killarney .. 89
Kilmacthomas .. 115
Kilmallock .. 77, 94
Kilrush .. 66
Kinsale .. 78

L.

Larne .. 124
Letterkenny .. 144
Limavady .. 163
Limerick .. 67, 95
Lisburn .. 125, 153
Lismore .. 116
Lisnaskea .. 161
Listowel .. 90, 96
Londonderry .. 145, 164
Longford .. 29
Loughrea .. 182
Lurgan .. 126, 130, 154

M.

Macroom .. 79
Magherafelt .. 165
Mallow .. 80
Manorhamilton .. 190
Middleton .. 81
Millford .. 146
Millstreet .. 82
Mohill .. 191
Monaghan .. 169
Mount Bellew .. 183
Mountmellick .. 24, 44
Mullingar .. 50

N.

Naas .. 13, 57
Navan .. 38
Nenagh .. 102
Newcastle .. 97
New Ross .. 3, 18, 54
Newry .. 131, 155
Newtownards .. 156

O.

Oldcastle .. 39, 138
Omagh .. 175
Oughterard .. 184

P.

Portumna .. 185

R.

Rathdown .. 7, 58
Rathdrum .. 59
Rathkeale .. 98
Roscommon .. 204
Roscrea .. 25, 45, 103

S.

Scarriff .. 68
Shillelagh .. 60
Skibbereen .. 83
Skull .. 84
Sligo .. 208
Strabane .. 147 176,
Stranorlar .. 148
Strokestown .. 205
Swineford 197

T.

Thomastown .. 19
Thurles .. 104
Tipperary .. 99, 110
Tobercurry .. 209
Tralee .. 91
Trim .. 40
Tuam .. 186
Tullamore .. 26, 51

U.

Urlingford .. 20, 111
